TECHNOLOGY + LIFESTYLE GUIDE

Life With An Intelligent Home + Office

WOW electronics

WELCOME TO THE WORLD OF ENTERTAINMENT, WELLNESS AND INTELLIGENT TECHNOLOGY.

You dream, we deliver. Our company specializes in leveraging cutting-edge technology to create customized solutions that enhance your living and working environments. Whether you envision a home with automated lighting and shades that adjust on schedules, a modern office at home or work or a space filled with high-quality music and video accessible from everywhere, we bring your imagination to life.

Our goal is to provide you with environments that are not only technologically advanced but also healthy, secure and connected – even when you're away. With decades of expertise, we've helped numerous families and businesses like yours maximize their technology.

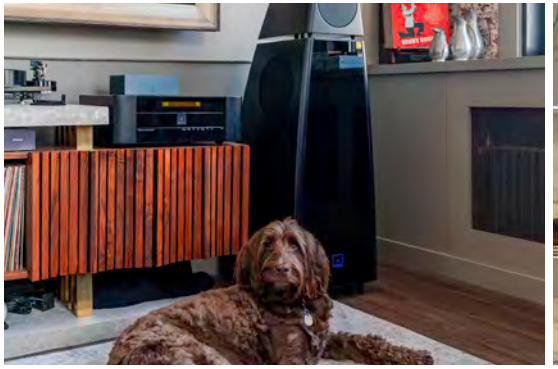

We offer a range of services, from integrated design to the installation of innovative products. Additionally, we can work closely with your architect, builder, and designer to turn your vision into reality.

We're excited to arrange your private consultation where we can tailor solutions to your specific needs, and you can see how elegantly functional, simple and beautiful a high-performance world can be. Thank you for considering our services.

Dune
A new duke takes over a valuable planet amid political intrigue, while his son begins a journey to fulfill an ancient prophecy.

NOW YOU SEE IT . . . NOW YOU DON'T.

No wires, no technology that overshadows the room design. The aesthetics of today's home technology can elevate the decor and sophistication—or stay out-of-sight all together. Modern media rooms and entertainment spaces featuring beautiful art that turns into a TV. Speakers that are heard but never seen. And control of it all from the most elegant wall panel that displays family photos when off or recognizes you and turns on to accommodate your every wish.

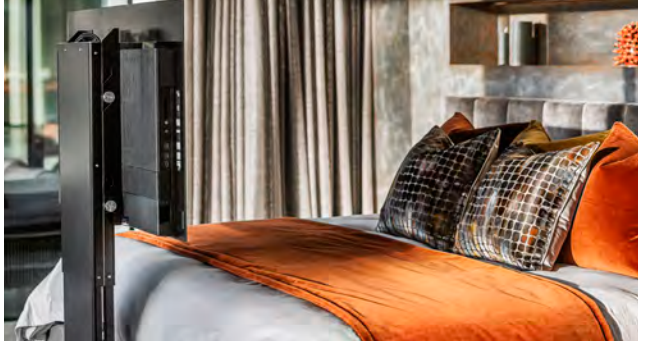

Beautiful artwork magically becomes a TV at the touch of a button

Revolutionary sound quality comes from completely invisible speakers

Custom mirrors that mysteriously transform into TVs

Recessed mounting and sliding cabinetry reveal and conceal displays in seconds

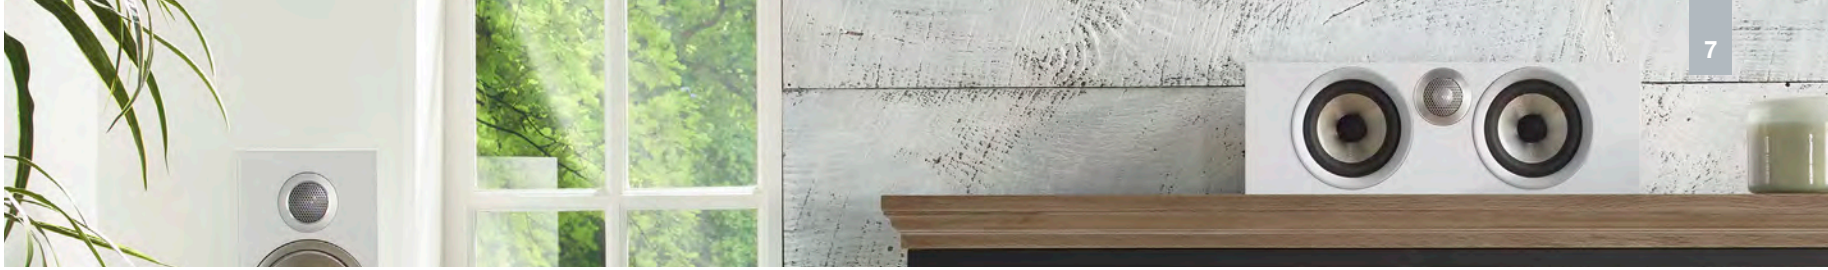

MAGICAL TECHNOLOGY THAT KNOWS ITS PLACE INSIDE AND OUT.

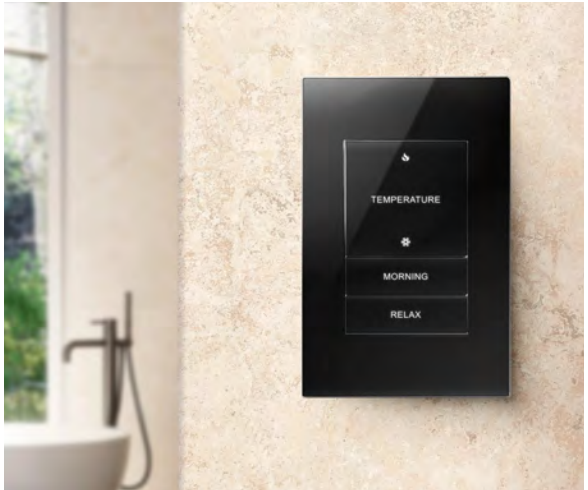

Celebrate your interior design by controlling all electronics with sleek, architectural keypads made to match your decor.

ONE TOUCH – OR ONE WORD.

Sophisticated but so simple; your home responds to the touch of a fingertip or a simple voice command. Whole house music, video, security and all the rest. Control from on property or off. Schedule things to occur in sync with the sun, the clock or your whim. Approach a screen, and it automatically adjusts the room to your preferred settings. You control your spaces—not the other way around. Even deliver fresh air, water and lighting that aligns with your spirit and body rhythm that makes life better every day.

Seamless controls simplify daily interaction with entertainment, lights, shades, climate, security and more

Personalized, bespoke devices suit you, your family and your lifestyle

Robust, highly secure networks ensure you're always connected and safe

Privately monitor and access your entire property while at home or away

IT'S PERSONAL. AND ELEGANTLY POWERFUL.

From endless entertainment to state-of-the-art lighting, climate and security systems, a smart home can be personalized to your environment while responding to every command. All things operate in harmony. Elegant touchscreens, remotes and apps celebrate your individuality and design aesthetic—each user gets what they like best. Press an icon to simplify morning routines. You'll gently raise lights and shades, turn on news and start your day effortlessly. Instant feedback shows what's going on throughout the house and yard—from anywhere.

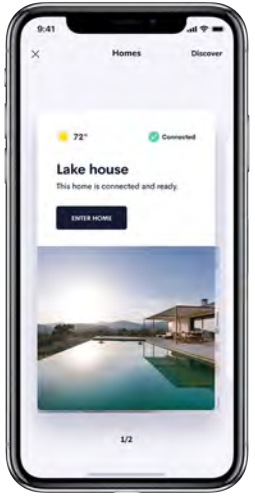

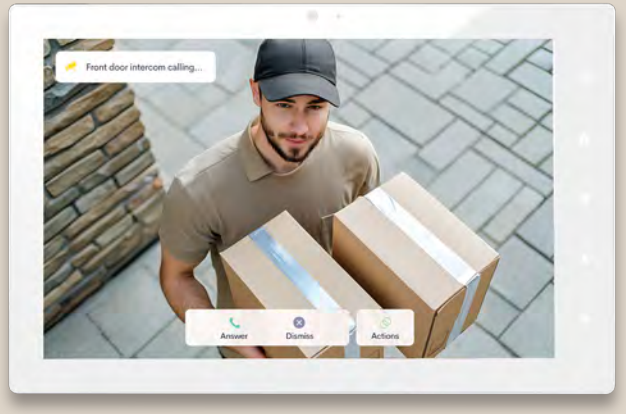

CONNECT TO HOME BASE FROM ANYWHERE IN THE WORLD.

Put your home in hand and live life to the fullest. Our innovative, versatile control systems live on a robust, highly secure network so your home is always safe, connected and privately accessible from wherever you are. Receive alerts when gates open. See, hear and respond to visitors, whether you're in the kitchen or in the country. Program lights and temperature to adjust at set times. One touch on your smart device is all it takes to monitor, control and ensure peace of mind from across the room—or the globe.

LIGHTING FOR LIFE.

Today’s smart lighting enhances life in profound ways. Imagine a mood. Then with a designer keypad, set your space effortlessly for relaxation or entertainment. Enhance overall beauty, convenience and security. Luxury lighting fixtures and technology awaken the spirit in the morning while shades automatically rise. Natural light then follows you throughout the day for enhanced energy and wellbeing. In the evening, lighting subtly accentuates your home’s architecture and art while protecting the entire perimeter.

SHADES THAT SYNCHRONIZE – AND SUIT YOUR STYLE.

Beautiful designer shades that can synchronize to the day, the season or your command. Whisper-quiet and stealthy as they gently rise and lower to elevate your sophisticated residence. Modern motorized shades are available in countless colors and styles and can be easily controlled from anywhere using remotes, keypads or panels. Effortlessly operate shades room-by-room or coordinate them with lights. One press of “good night” on your smart device lowers house shades while all lights turn off.

Natural lighting indoors mimics the patterns of the sun throughout the day

Beautiful light that dramatically enhances energy levels, mood, and sleep—all year long

Accentuate decor, special artwork and food in the most natural way

A smart home delivers wellbeing automatically—without lifting a finger

NATURAL LIGHTING FOR A WORLD OF WELLBEING.

Natural lighting indoors is as remarkable as it is beautiful. This lighting changes throughout the day as the sun does—in perfect harmony with your body, bringing with it better energy, mood and sleep. Bright tones for your day. Warm, relaxing tones at night that signal it's time to rest. Beyond wellness, new natural lighting also transforms your home decor and artwork. It delivers the precise levels, spread and tones that accentuate your environment like never before. You'll see your home in a whole new light with all the benefits nature intended.

Hot Piano
BENNY GOOD

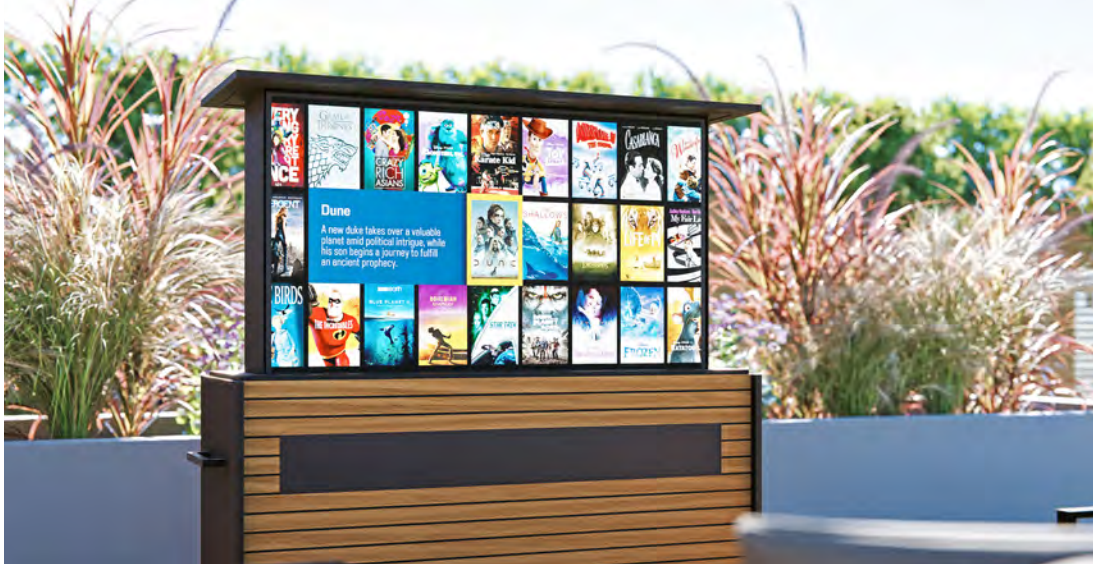

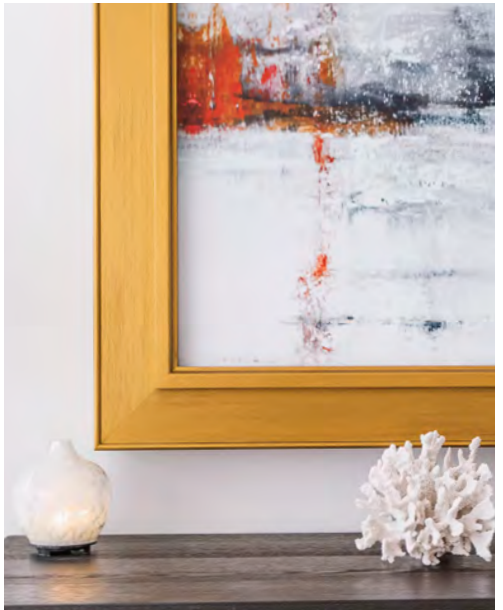

YOUR HOME WITH A SOUND ALL ITS OWN.

High-quality music—anywhere and everywhere. All the favorites in all rooms, or each person chooses what they want just where they are. Set house-wide ambiance with soft background tunes. Or make music the center of attention with an awe-inspiring music listening room, equipped with turntable and ultra-high-performance loudspeakers that look as stunning as they sound. Music is personal, and brings life to a home. That's why we tailor it to you and yours.

A PICTURE YOU'LL NEVER FORGET.

Luxury living embraces the most brilliant video entertainment—which is virtually unlimited thanks to streaming. And it's all on command with infinite variety. Watch the news on a simple TV setup in your office or behold all the drama and magic of movies on a cinema-quality big screen in your media room or home theater. New hidden TVs are entirely concealed behind walls and only revealed when ready to start the show.

Displays that bring stunning, high-resolution video to life with extraordinary realism

Discreet TVs that hide in cabinets, behind walls or double as art that blends in beautifully

Life-size, cinematic-quality video walls and projectors provide the ultimate immersive movie and sports experience

Technologies that deliver all the clarity, brightness and contrast the creator intended

The Incredibles
A middle-aged hero living in the suburbs with his super-powered family dusts off his tights to confront a mysterious threat.

A MOST ENGAGING SPACE.

Media Rooms—they're all about listening, watching, gaming and gathering. A place where multiple activities come together on a regular basis. Play life-sized video games, stream music as you shoot pool, initiate a family video call and maximize every experience with multiple big screens. This is today's carefully designed entertainment space where all the big fun merges beautifully. And high-style media furniture provides a personalized look, storage and proper ventillation, while simultaneously creating a show-stopping centerpiece. Party, relax, enjoy—it's all at your command from an easy-to-use remote, touchscreen or smart device.

SOOTH YOUR SOUL
WITH AUDIOPHILE SOUND.

Unlike almost anything in life, music moves us. Imagine bringing the breathtaking concert experience to your own home. Groundbreaking, studio-grade audio technologies that elevate every performance. Spin vinyl on a gorgeous turntable, while audiophile-quality loudspeakers deliver the finest in design and sound to shake you to your core. Hear fingertips strumming the guitar as if the artist is in the room. This is the magic of high-fidelity music at its most advanced. We can bring it to multiple spaces—or to that special listening room where you escape from the world.

A HIGH-PERFORMANCE PLACE FOR ENTERTAINMENT.

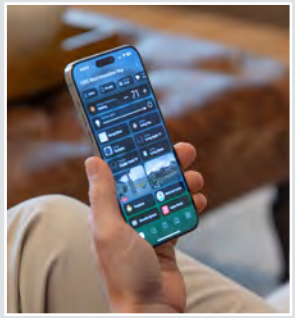

Your family snuggles together in authentic, comfy theater seats while lights automatically dim. You're not out at the movies, you're right at home. Suspense fills the air as a massive widescreen comes to life in the highest definition. Music fades in, then rises to completely immersive sound, taking you to that special place the director envisioned. One single, personalized remote allows you to adjust the entire system in an instant, so you make the most of every magical moment.

Security throughout your entire property with state-of-the-art cameras and lighting

Real-time surveillance from your couch—or anywhere in the world

Simple controls let you instantly see who's at the front door or front gate

Alerts sent when a door or window opens, while video automatically records

PEACE OF MIND AND CAREFREE COMFORT.

Safety first, safety throughout. Coordinate home security alarm and camera surveillance control into your smart home and extend the blanket of safety even further. Cameras record who enters the gate and driveway while a doorbell camera lets you see and speak to the delivery person or cleaning staff—even if you happen to be on vacation. This is what carefree living is all about. Automated comfort and total security from wherever you are in the world.

OPEN YOUR DOOR TO PARADISE.

Step out into serenity. In the past, our living spaces ended when the patio door opened. Not anymore. Modern living incudes all-encompassing entertainment from patio to poolside—and far beyond. Your entire property is your canvas. New technologies include stylish, all-weather landscape speakers and soundbars, robust weatherproof TVs and sophisticated outdoor control from a variety of devices, including your own mobile phone or tablet.

All-weather TVs deliver an extraordinary, high-definition picture to sun and shade spaces

Immersive sound emanates from invisible landscape speakers and underground subwoofers

Soft lighting for security and entertainment carries you beautifully from day into night

Motorized screens seal outdoor environments to protect from insects and harmful UV

THE SKY'S THE LIMIT WITH OUTDOOR ENTERTAINMENT.

Music flows from covert speakers, setting the aura on a terrace or across the entire property. With your smartphone, bring on the soothing jazz to sip martinis on the porch. Or couple crystal-clear sound with an all-weather, premium TV to give the big game and barbeque a boost. Bring it together with indoor spaces, so video and music move with you from room to room. Need it a bit quieter for a conversation? It's a press on your phone from wherever you are.

NEVER A DARK HOUSE AGAIN.

Outdoor lighting is no longer a luxury. For safety, beauty and to extend the evening into the night, tastefully balanced outdoor lighting turns an average yard into a world where the days are longer and the nights are more invigorating—and secure. Light up your pathways, your parties and your entire exterior. Outdoor lighting can be automatic based on time of day or easily controlled with a single press, while warning intruders to stay away. Brighter nights, safer property and endless possibilities are yours.

Enterprise-grade, secure networks handle multiple people working and learning from home

High-performance displays and lighting enhance conferencing, learning and engagement

Designer, AV furniture supports proper camera, mic and component positions, making the most of all technologies

Personalized smart controls enable fast, simple connection and collaboration

A HOME THAT WORKS FOR YOU – AND THE FAMILY.

Our home lives today involve more people and devices than ever. The modern work solutions we deliver offer many of the same capabilities we provide for your workplace to make collaboration smarter and smoother. Elevate performance of Wi-Fi and displays to support high-bandwidth activities like video meetings, family video calls and e-learning. Enterprise networks offer the reliability and security necessary to connect to the world. With quality tech furniture proper lighting and controls, you'll experience meeting environments that enrich engagement.

High-performance screens and video walls bring every presentation, participant and detail into clear view—onsite or remote

Purposeful, easy-to-adjust lighting enhances comfort, focus and camera presence for every meeting or collaboration session

Ergonomic, technology-ready furniture conceals cables, power and components while creating a polished, productive environment

MODERN WORKPLACE SOLUTIONS FOR NEXT-LEVEL PRODUCTIVITY.

Today's business environments demand seamless video conferencing, collaboration and meeting experiences. With the combination of powerful smart controls, advanced lighting, well-integrated AV systems and the right ergonomic furniture, your enterprise spaces can achieve unmatched performance, flexibility and ease of use. These systems are designed to work turnkey with the most popular meeting platforms such as Microsoft Teams, Cisco and Zoom—ensuring every connection is effortless and reliable.

Unified smart room control systems take simplicity and efficiency to the next level. With a single touch, users can instantly set the perfect environment—adjusting lighting, managing AV and launching meetings and conferencing sessions automatically. The result is a consistent, intuitive experience that saves time and keeps every meeting running smoothly from start to finish.

RELAX, WE'VE GOT THIS.

As your local premium technology integration firm, we consider your life and needs from the very start. Our promise is to serve your family as if it were our own with unprecedented attention to detail. It’s how we built our business, and what sets us apart. We offer the most extensive product expertise and a trained, professional staff that stands by you from planning to installation—and most important—ever after.

WORKING WITH ALL – ALL AROUND THE CLOCK.

Our company can also work together with your architect, builder or interior designer to create the most seamless, beautiful and functional home. Our project managers coordinate with all trades and can even manage the process start to finish if you desire. Experience world-class service that adapts to your personal needs and is there for you around the clock, today and into the future.
